5. Micro-Mystwood Games - Review of recent playtest
  - Small group of players and NPC's had a small Mystwood Adventure where two stories were run. The players of the first story NPCed the second story. The GM Truax M. made excellent use of the entire larp site. This was a lot of work for the game runner, there were not many tangible rewards due to the structure of the event. The death system was a little wonky since players came from different sites and it wasn't an official game. The adventure was fun and challenging, but not challenging because a monster was statted too high, it was because the adventure party was small and not heavily supplied. Every encounter was balanced since the game director knew who was coming. It felt like a DnD game. This could be an interesting way to do some pathfindings, but not all.
